Sauna - Finnish sauna house

The sauna house is built on the highest point of the property and is accessed by a wooden staircase, so we recommend that you bring outdoor slippers with you. The sauna house is shared, but we do not insist on this. So it can also be used privately. For environmental reasons, the sauna house is not heated all the time (as there is a maximum of 4 guests in the chalets at one time), so it is self-service and we will show you how to use it on arrival, but we can also turn it on if required. The sauna takes about 30-45 minutes to heat up. A short demonstration of how to switch on the sauna heating is also available in the building.

The windows in the guest house are protected with mosquito nets. Nevertheless, please be aware that being close to nature can sometimes cause minor inconveniences (meaning: mosquitoes bite you (although there are few here), birds sing louder, wasps smell food, ants gnaw on crumbs, etc.)
