

JACUZZI POLICIES

You can use our outdoor jacuzzi at your own risk, knowing your health condition.

The jacuzzi has one lying and two sitting areas, with a total of 36 water jets for massaging the entire body.

In the following lines we have summarised the important information concerning the use of the jacuzzi, please follow them.

Basic rules

The jacuzzi is essentially a place for relaxation and massage, promoting physical and mental recharging. Please do not use it for washing up.

Do not enter the jacuzzi when sweaty (after sunbathing, sports, sauna). Always shower before use.

Placing candles on the edge of the jacuzzi is FORBIDDEN! Do not use it in make-up or with lotion (sunlotion, bodylotion), as it will impair the quality of the water. It is strictly FORBIDDEN to put foreign substances (e.g. soap, shower gel) in the water!

Pregnant women, people on medication or with circulatory problems should seek medical advice before use.

Be cautious when entering and exiting the hot tub due to the risk of slipping, switch off the massage functions before entering to see where you are stepping.

Do not use electrical objects in the hot tub as it may cause electric shock.

Stay out of the jacuzzi during storms!

The hot tub is for 2 people at a time.

As prolonged bathing in water temperatures above 38°C can be harmful to health, we recommend that those sensitive to hot water use the hot tub at a lower temperature and for shorter periods.

To avoid unconsciousness and possible drowning, do not drink alcohol before or during using the jacuzzi.

To avoid contamination, please do not bring food or drink into the hot tub.

Preparations

Before using the jacuzzi, take a thorough shower and wash off any creams, lotions or make-up from your skin to prevent them from getting into the water (they can cause the water to foam and deteriorate the quality of the water).

The thermo cover can be folded in half and be pulled down onto a mat on one side of the jacuzzi and placed there before use.

Using the jacuzzi

The display shows the current temperature, which can be adjusted using the up and down arrows. Press one of the arrows to start flashing the temperature on the display. While the temperature is flashing on the display, do not touch any buttons (other than the up and down arrows) as this may stop the programme. The temperature is continuously lit once it has been set.

The default setting is 37 degrees in cold weather and 34 degrees in summer. Do not set the temperature higher than 38 degrees to avoid possible sickness.

During the massage program, you can enrich the water with oxygen by turning the grey rotary knob on the edge of the jacuzzi, increasing the water jet intensity.

The massage programme runs for 15 minutes and then stops. However, pressing JET again will restart the programme.

Press the LIGHT button repeatedly to switch the light therapy on and off. You can choose different colours. The FLIP button turns the direction of the display.

The jacuzzi will automatically purify/water rotate at pre-programmed intervals, when certain jets will operate and ozone bubbles will rise from the bottom of the pool. This is completely normal and cannot be switched off.

When the pool is heating the water, the water rotation is automatically switched on, this is also normal and cannot be switched off.

If something falls into the water, you can find the net in the side of the breakfast cupboard.

Finishing using the Jacuzzi

Exit the hot tub carefully.

Please switch off any massage or light therapy programmes that may still be running.

Lift the thermo cover back onto the pool and make sure it fits properly everywhere. This will prevent the water temperature from cooling down and dust from entering.

Secure the thermo cover with the buckles, as it can be blown off in windy weather.

The jacuzzi doesn't have to be turned off after use (it's not possible, nor permitted), just put the thermo cover back on.

Other

Please keep the water clean and always leave the jacuzzi in the condition you would like to find it next time.

If you experience any malfunction, abnormal operation or if the display shows an error message, please let us know.

If the water in the jacuzzi is contaminated, please notify us so that we can start cleaning/changing the water as soon as possible.

Thank you for your cooperation, we wish you a pleasant stay and relaxation!
